- Project 2

# Namespaces in XML 1.1 (Second Edition)

## History

- Recommendation as of 1/99.
  - "XML namespaces provide a simple method for qualifying element and attribute names used in Extensible Markup Language documents by associating them with namespaces identified by URI references."

# Namespaces in XML 1.1 (Second Edition)

## Declaring

```
<cscie259:foo  
    xmlns:cscie259="http://www.fas.harvard.edu/~cscie259/namespace">  
    <bar baz="qux"/>  
    <oogle cscie259:foogle="google"/>  
</cscie259:foo>
```

a unique URI

# Namespaces in XML 1.1 (Second Edition)

## Defaulting

```
<foo  
    xmlns="http://www.fas.harvard.edu/~cscie259/namespace">  
    <bar baz="qux"/>  
    <oogle foogle="google"/>  
    </foo>
```

a unique URI

# SVG 1.1

## History

- Recommendation as of 1/03.
  - “SVG is a language for describing two-dimensional graphics in XML. SVG allows for three types of graphic objects: vector graphic shapes (*e.g.*, paths consisting of straight lines and curves), images and text.”

# SVG 1.1

## Bitmaps

# SVG 1.1

## Shapes

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE svg PUBLIC "-//W3C//DTD SVG 1.1//EN"
  "http://www.w3.org/Graphics/SVG/1.1/DTD/svg11.dtd">

<svg:svg xml:space="preserve"
  xmlns:svg="http://www.w3.org/2000/svg">
  <svg:rect style="fill:blue;" width="250" height="100"/>
</svg:svg>
```

Adapted from <http://www.adobe.com/svg/basics/getstarted2.html>.

Viewable at <http://www.fas.harvard.edu/~cscie259/distribution/lectures/6/examples6/svg/text.svg>.

# SVG 1.1

## Shapes

```
<circle cx="25" cy="25" r="20" fill="red"/>
```

```
<ellipse cx="25" cy="25" rx="20" ry="10" fill="red"/>
```

```
<line x1="5" y1="5" x2="45" y2="45" stroke="red"/>
```

```
<polygon points="5,5 45,45 5,45 45,5" stroke="red" fill="none"/>
```

```
<polyline points="5,5 45,45 5,45 45,5" stroke="red" fill="none"/>
```

```
<rect x="5" y="5" rx="5" ry="5" width="40" height="40" fill="red"/>
```

# SVG 1.1

## Paths

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE svg PUBLIC "-//W3C//DTD SVG 1.1//EN"
  "http://www.w3.org/Graphics/SVG/1.1/DTD/svg11.dtd">

<svg:svg xml:space="preserve"
  xmlns:svg="http://www.w3.org/2000/svg">
  <svg:path d="M 50 10 L 350 10 L 200 120 z"/>
</svg:svg>
```

Paths are described using the following data attributes: "moveto" [M] (set a new current point), "lineto" [L] (draw a straight line), "curveto" [C] (draw a curve using a cubic Bezier), "arc" [A] (elliptical or circular arc), and "closepath" [z] (close the current path by drawing a line to the last "moveto" point).

Adapted from <http://www.adobe.com/svg/basics/getstarted2.html>.

Viewable at <http://www.fas.harvard.edu/~cscie259/distribution/lectures/6/examples6/svg/path1.svg>.

# SVG 1.1

## Paths

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE svg PUBLIC "-//W3C//DTD SVG 1.1//EN"
  "http://www.w3.org/Graphics/SVG/1.1/DTD/svg11.dtd">

<svg:svg xml:space="preserve"
  xmlns:svg="http://www.w3.org/2000/svg">
  <svg:path d="M5,45 C5,5 45,5 45,45" stroke="red" fill="none"/>
</svg:svg>
```

Paths are described using the following data attributes: "moveto" [M] (set a new current point), "lineto" [L] (draw a straight line), "curveto" [C] (draw a curve using a cubic Bezier), "arc" [A] (elliptical or circular arc), and "closepath" [z] (close the current path by drawing a line to the last "moveto" point).

# SVG 1.1

## Anchors

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE svg PUBLIC "-//W3C//DTD SVG 1.1//EN"
  "http://www.w3.org/Graphics/SVG/1.1/DTD/svg11.dtd">

<svg:svg xml:space="preserve"
  xmlns:svg="http://www.w3.org/2000/svg"
  xmlns:xlink="http://www.w3.org/1999/xlink">

  <svg:a xlink:href="http://www.fas.harvard.edu/~cscie259/" target="_blank">
    <svg:text style="fill:red;" y="15">This is CSCI E-259.</svg:text>
  </svg:a>

</svg:svg>
```

# SVG 1.1

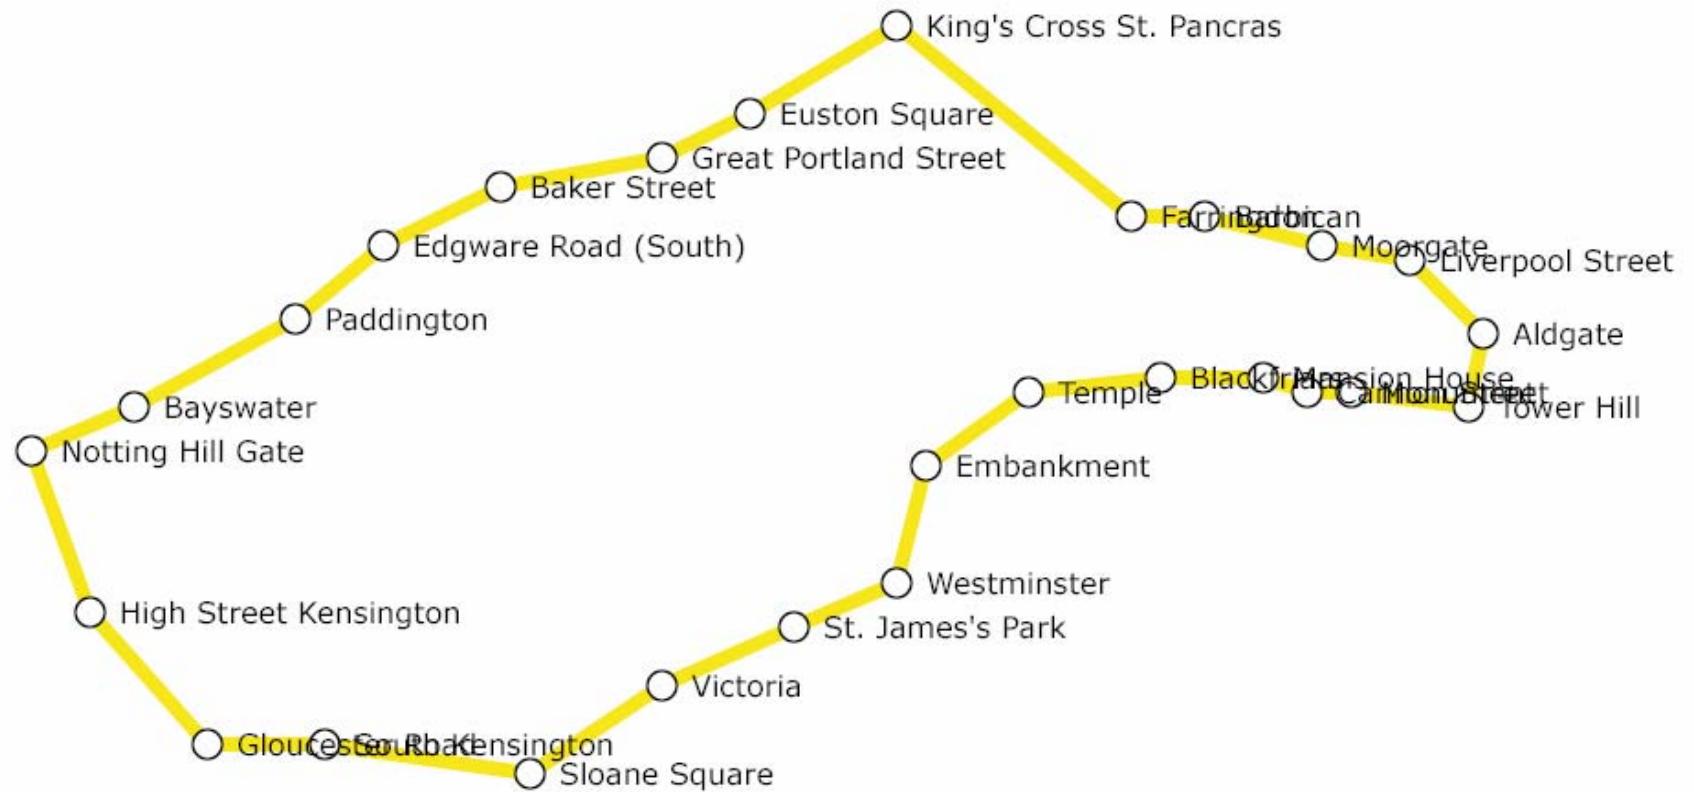

## Using Definitions

```
<defs>
    <rect id="rect" width="15" height="15" fill="red"/>
</defs>
<use x="5" y="5" xlink:href="#rect"/>
<use x="30" y="30" xlink:href="#rect"/>
```

# SVG 1.1

## XTube

# XSL (XSL-FO) 1.1

## History

- Extensible Stylesheet Language (XSL) Version 1.0 is a recommendation since 10/01.
  - “Given a class of arbitrarily structured XML documents or data files, designers use an XSL stylesheet to express their intentions about how that structured content should be presented; that is, how the source content should be styled, laid out, and paginated onto some presentation medium, such as a window in a Web browser or a hand-held device, or a set of physical pages in a catalog, report, pamphlet, or book.”
- Builds on CSS2 and Document Style Semantics and Specification Language (DSSSL).

# XSL (XSL-FO) 1.1

## Rendering

- Framemaker's Maker Interchange Format (MIF)
- HP's Printer Control Language (PCL)
- Java's Abstract Window Toolkit (AWT)
- Portable Document Format (PDF)
- Postscript
- Rich Text Format (RTF)
- Scalable Vector Graphics (SVG)
- Text

# XSL (XSL-FO) 1.1

## hello, world

```
<?xml version="1.0" encoding="iso-8859-1"?>

<fo:root xmlns:fo="http://www.w3.org/1999/XSL/Format">

    <fo:layout-master-set>
        <fo:simple-page-master master-name="mylayout">
            <fo:region-body margin="1in"/>
        </fo:simple-page-master>
    </fo:layout-master-set>

    <fo:page-sequence master-reference="mylayout">
        <fo:flow flow-name="xsl-region-body">
            <fo:block>hello, world</fo:block>
        </fo:flow>
    </fo:page-sequence>

</fo:root>
```

# XSL (XSL-FO) 1.1

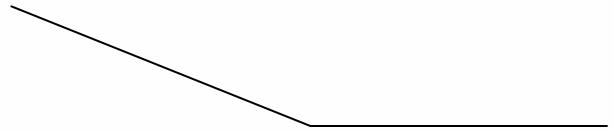

## Terminology

- master
  - "pagination and layout specifications"
- flow
  - "the content that is distributed into the pages"
- block
  - "The fo:block formatting object is commonly used for formatting paragraphs, titles, headlines, figure and table captions, etc."
- inline
  - "The fo:inline formatting object is commonly used for formatting a portion of text with a background or enclosing it in a border."

# XSL (XSL-FO) 1.1

hello, world

```
<?xml version="1.0" encoding="iso-8859-1"?>
```

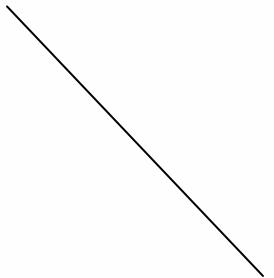

XML declaration

# XSL (XSL-FO) 1.1

## hello, world

```
<fo:root xmlns:fo="http://www.w3.org/1999/XSL/Format">
```

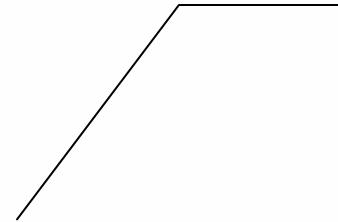

"This is the top node of the formatting object tree. It holds an fo:layout-master-set formatting object (which holds all masters used in the document), an optional fo:declarations, and one or more fo:page-sequence objects. Each fo:page-sequence represents a sequence of pages that result from formatting the content children of the fo:page-sequence."

```
</fo:root>
```

# XSL (XSL-FO) 1.1

**hello, world**

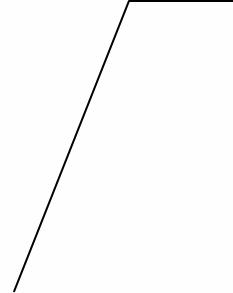

"The fo:layout-master-set is a wrapper around all masters used in the document. This includes page-sequence-masters, page-masters, and region-masters."

```
<fo:layout-master-set>
```

```
</fo:layout-master-set>
```

# XSL (XSL-FO) 1.1

## hello, world

"The fo:simple-page-master is used in the generation of pages and specifies the geometry of the page. The page may be subdivided into up to five regions: region-body, region-before, region-after, region-start, and region-end."

```
<fo:simple-page-master master-name="myfirst">  
  
</fo:simple-page-master>
```

# XSL (XSL-FO) 1.1

hello, world

"Used in constructing a simple-page-master. This region specifies a viewport/reference pair that is located in the 'center' of the fo:simple-page-master."

`<fo:region-body margin="1in"/>`

# XSL (XSL-FO) 1.1

## hello, world

"The fo:page-sequence formatting object is used to specify how to create a (sub-)sequence of pages within a document; for example, a chapter of a report. The content of these pages comes from flow children (consisting of the single fo:flow and any fo:static-content flow objects) of the fo:page-sequence. The layout of these pages comes from the fo:page-sequence-master or page-master referenced by the master-reference trait on the fo:page-sequence."

```
<fo:page-sequence master-reference="myfirst">
```

```
</fo:page-sequence>
```

# XSL (XSL-FO) 1.1

## hello, world

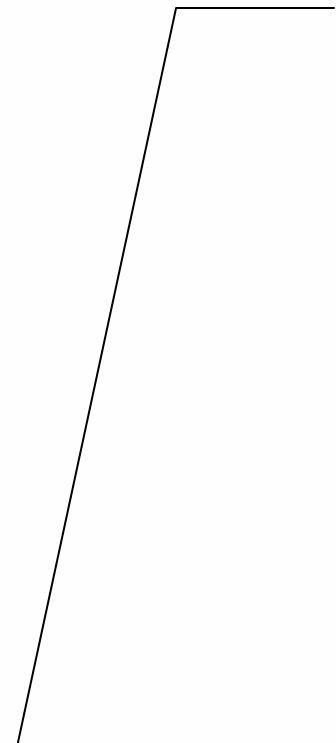

"The content of the fo:flow formatting object is a sequence of flow objects that provides the flowing text content that is distributed into pages. . . . The flow-names reserved in XSL are: xsl-region-body, xsl-region-before, xsl-region-after, xsl-region-start, xsl-region-end, xsl-before-float-separator, xsl-footnote-separator."

```
<fo:flow flow-name="xsl-region-body">  
  
</fo:flow>
```

# XSL (XSL-FO) 1.1

**hello, world**

"The fo:block formatting object is commonly used for formatting paragraphs, titles, headlines, figure and table captions, etc."

`<fo:block>hello, world</fo:block>`

# XSL (XSL-FO) 1.1

## Font Properties (plus fo:inline)

```
<fo:block color="#ff0000"  
         font-family="Times"  
         font-size="24pt"  
         font-weight="bold">  
    <fo:inline font-size="300%">h</fo:inline>ello, world  
</fo:block>
```

# XSL (XSL-FO) 1.1

## Text Properties (plus fo:inline)

```
<fo:block letter-spacing="3pt"
          text-align="justify"
          text-decoration="underline"
          text-indent="3cm"
          word-spacing="10pt">
<fo:inline text-transform="uppercase">Intended for
students with previous Java programming and web
development experience, this course introduces XML as a
key enabling technology in today's e-business
applications.</fo:inline> Students will learn the
fundamentals of XML: schemas, XSL stylesheets, and
programmatic access using standard APIs. Building on
these foundations, the course will explore in detail a
number of case studies that utilize XML in e-business:
e-commerce, web personalization, portals, and web
services. Data modeling techniques in XML will be
introduced in the context of the case studies.
</fo:block>
```

# XSL (XSL-FO) 1.1

## With XSLT

```
<?xml version="1.0" encoding="iso-8859-1"?>
<poem>
  <title>Jabberwocky</title>
  <poet>Lewis Carroll</poet>
  <stanzas>
    <stanza>
      <verse>'Twas brillig, and the slithy toves</verse><verse>Did gyre and gimble in the wabe;</verse>
      <verse>All mimsy were the borogoves,</verse><verse>And the mome raths outgrabe.</verse>
    </stanza>
    <stanza>
      <verse>"Beware the Jabberwock, my son!</verse><verse>The jaws that bite, the claws that catch!</verse>
      <verse>Beware the Jubjub bird, and shun</verse><verse>The frumious Bandersnatch!"</verse>
    </stanza>
    <stanza>
      <verse>He took his vorpal sword in hand:</verse><verse>Long time the manxome foe he sought--</verse>
      <verse>So rested he by the Tumtum tree,</verse><verse>And stood awhile in thought.</verse>
    </stanza>
    <stanza>
      <verse>And, as in uffish thought he stood,</verse><verse>The Jabberwock, with eyes of flame,</verse>
      <verse>Came whiffling through the tulgey wood,</verse><verse>And burbled as it came!</verse>
    </stanza>
    <stanza>
      <verse>One two! One two! And through and through</verse><verse>The vorpal blade went snicker-snack!</verse>
      <verse>He left it dead, and with its head</verse><verse>He went galumphing back.</verse>
    </stanza>
    <stanza>
      <verse>"And hast thou slain the Jabberwock?</verse><verse>Come to my arms, my beamish boy!</verse>
      <verse>O frabjous day! Callooh! Callay!"</verse><verse>He chortled in his joy.</verse>
    </stanza>
    <stanza>
      <verse>'Twas brillig, and the slithy toves</verse><verse>Did gyre and gimble in the wabe;</verse>
      <verse>All mimsy were the borogoves,</verse><verse>And the mome raths outgrabe.</verse>
    </stanza>
  </stanzas>
</poem>
```
